We are responding to the following question: Do you have any comments on the proposed deletion of land north of the University of Kent (C12)?

We wholeheartedly support the deletion of the policy C12 from the local plan for a variety of reasons - ecology- destruction of ancient woodland, increased traffic, effectiveness of demolishing of Blean Primary School. This area has meant a tremendous amount to us since we attended the University and we are dissapointed with the University for their proposals for such an irreplaceable area. We would add that our objections would therefore continue to apply to future proposals for a development in this area.

Thank you for your attention,  
Philippa Cottrell and Nicholas Mears
