To whoever reads this I am not going to bore you with how bad the Idea of a park and ride at the thaington rec and also the Merton park development with no new road access is , Canterbury city council should be hanging there spineless heads in shame at the local plan they are looking to rubber stamp though regardless of the implications for future generations loss of green space and rural countryside, if they still have any morality left they would stand up to central governments insane development targets driven by Fabian ideology with no regard for the city we live in, if this is passed as is I hope you can live with your selves . The legacy of shockingly disjointed developments and destruction of our beautiful citys outskirts we be on your shoulders, wake up and smell the coffee you could actually make a difference to the constituents that put you there .The local plan as it stands is not fit for purpose and is just a desperate attempt to meet a unsustainable target . regards Gary Port
