I wish to voiced concern about the proposed development of 170 houses on greenfield sites in Chatham. I do feel that this will put too much strain on the infrastructure. Also there are a number of Brownfield sites that could be used and should be use before we takeaway . Agricultural land . also it will increase the danger of flooding in Chatham Village There is also a strong smell of sewage coming from the new buildings being built above this area. Which drain down across this area into the river there is also what will be built on chartham mill site again with the risk of flooding on into Canterbury we need this farmland to help drain this area and stop the flooding Mrs Jacqueline samson ..
