Ref:Policy N20 and Policy N21 and N23 and N 24

Dear Sir,

We write to object to the proposed planning for the 220 houses noted in the above.

The roads in the area are already becoming more dangerous and pollution is increasing, in addition to this the current infrastructure is inadequate for the current housing without adding to the problem.

South East Water seem unable to cope with the demands of the current population ,increasing more demands on an already stretched system seems ridiculous.

Healthcare and dentistry will suffer considerably with more people to cope with.

It would appear to the planners that joining Whitstable and Chestfield with Herne Bay is the ultimate goal, this surely must not happen. To lose more green spaces and suppressing wildlife cannot be right.

These 220 houses are in addition to the 1350 houses which are being considered. This is totally unacceptable.

Yours faithfully
