Dear Consultation team

My letter is about the proposed development of the Merton Park Estate.

I would like to start by outlining I am not in opposition to housing developments in the Canterbury area. **If they are not to the degradation of**

- Biodiversity of the Canterbury Area
- Impacting massively on the local highway infrastructure.
- Health and wellbeing of the people of Canterbury.
- Overwhelming of local schools, hospitals.
- Overwhelming of current Water, Sewage and Utility services.

The proposed Merton Park development affects each of the above points and the development should be taken out of the Local Plan.

I attended a very well-turned-out local meeting at the Heaton Road Scout Hall last night 17th October, where a number of people spoke on how the development will impact their lives and those of their children. The proposed development site of the Playing fields, arable fields and orchards are an amazing open space, which afford the local community a space to exercise, congregate and see the amazing Biodiversity. To take this away is madness as it will never be replaced.

How the development is still being considered now that the proposed slip road from the A2 is no longer a possibility is total madness, the proposed local roads to access the development are already a nightmare to navigate and to add to this is madness will be a folly of enormous consequences.

Sincerely
