just writing an email to object to the proposed plans of 150 new houses & 70 houses and traveller site on the land at golden hill... we do not want this! The drains and road system cannot possibly take this level of traffic never lone the Noice pollution! This will create more road accidents due to more cars on the road, more sewage! More water consumption and even shortages due to the size of the drains & pipes! And more people in the area means less chance of getting a doctors appointment due to the sheer number of people this would bring in! Less greenery which means this effect animals & wildlife.... absolutely not! Defiantly do not want this anywhere near here!
