Dear sirs

Point 1

My main concern is that there is not enough work to support purchasers of this excessive building of four bedroomed houses. These will then be bought by landlords or councils to move families on benefits from London to free up prime working locations in the London boroughs. This is heavily rumoured. Can the council confirm how they intend to protect the area from this.

Point 2

Clearly there are not the schools, the infrastructure. Doctors, drainage etc.

Point 3

The road system's are failing. I live on [REDACTED] on Bullockstone Road and I am not only surrounded but at saturation point. The houses aren't even built yet and the roundabout and bridge at Bullocksone road are jammed. There is no way to widen the road as there are bungalows either side !,,

Point 3

The rural aspect and surrounding countryside

All of the above is important but mainly where is the work to support this development ? What about the out dated and extremely slow railway system and transport links from Herne Bay to get the to any reasonable job? An example of wrong time wrong place is Parkway station on Thanet. Please, please think this's through beyond government targets to the type of area this could become

Yours
