Good Afternoon,

I object to the local plan of development of BROOKLANDS FARM WHITSTABLE.

Reasons being:

Risk of subsidence on the roads when new junctions are made.(new Thanet Way and old are already subsiding).

Water Supply:

There has already been supply issues with drinking water, low pressure or no water at all as you are well aware. How is SE Water able to supply the extra housing, businesses, present and new?

Sewage:

Southern Water are again in court for polluting Swalecliffe Brook, also discharging sewage into the sea. How are they going to cope with the extra housing and businesses?

Wildlife/nature:

A huge loss of wildlife and nature around a peaceful environment. Loss of good farmland and way of life for all.

Health Care:

How will our dentists (if you can find one), doctors surgeries and hospitals cope with the huge extra demands? Our A&E's are already stretched, waiting all night to be seen, people old and young left on trolleys in the corridors (this is from a recent experience when my husband suffered a stroke).

I have live in Whitstable for [REDACTED] I recognise it anymore. BROOKLANDS FARM is part of Whitstable...

Regards
Jacqueline Balch
