I wish to object to local plan on grounds of existing roads not able to take the extra traffic. The sewerage in Chestfield have had major problems in Maydowns Rd with smells coming from the new builds in Herne bay. Also existing sewage struggling as it is..Noticed our water pressue much lower than it was 22 years go.We get flooding at South Street end of Chestfield after we have had heavy rainfall, so building more houses in South Street will add to the problem,as nowhere for the water to go ,if fields are built on. The wildlife in Brookland Farm will lose their natural habitat. The developers are selling the social housing to London Boroughs and as in Whitstable Heights,already getting the social problems from the people being moved down. Existing facilities already strapped to see doctors or dentists.Too much development going on in last 3 years on green field sites. Need to use Brown field sites to redevelop in the future.Shops such as Debenhams old building and Nason's need redevelopment for future houses,not green belt.Planners need to look at these sites,not green belt.We need to be able to feed our country in the future.If all green spaces taken ,what chance has future generations got.Once built on we can't claim back these precious sites.Please stop filling in our countryside.,and listen to us.

Mrs F Ritson
